

Instructions :

*For each statement, assign : **2 points** = Fully supported / **1 point** = Partially supported / unclear / **0 points** = Not supported*

1. Architecture & Modularity (Max 10 points)

Statement	Score (0-2)
The platform offers a modular architecture where only the necessary modules are activated	
Each module/ functional domain operates independently	
A central core ensures consistent governance and business rules across all modules	
Modules can be deployed or scaled independently	
The system is API-first by design	

2. Adaptability & Future readiness (Max 10 points)

Statement	Score (0-2)
New departments or business units can be added seamlessly.	
Each module/ functional domain operates independently.	
The platform supports low-code or configuration-based extensions.	
The vendor has a clear product roadmap aligned with long-term evolution.	
Organizational restructuring does not require reengineering the system.	

3. Scalability & Performance (Max 10 points)

Statement	Score (0-2)
The platform supports multi-entity and multi-country operations	
Performance benchmarks are documented and measurable	
The system maintains speed under high concurrency	
Modules can scale independently based on operational demand	
Infrastructure flexibility (cloud, hybrid, on-premise) is available	

4. Integration & openness (Max 8 points)

Statement	Score (0-2)
APIs are fully documented and accessible	
Third-party integrations are supported without workaround solutions	
Data export is structured and unrestricted	
You can switch vendors without major disruption	

5. Security & Governance (Max 6 points)

Statement	Score (0-2)
Data handling and storage comply with regulatory requirements, including GDPR and ISO standards (e.g., ISO 27001)	
Audit trails are available across modules	
Supports role-based access control	

6. User & Data Experience (Max 6 points)

Statement	Score (0-2)
Teams have real-time visibility across workflows, KPIs, and dashboards	
The platform provides a modern, intuitive user experience with web and mobile accessibility	
Reports can be generated, extracted, and interpreted effortlessly	

Score Interpretation :

41–50 points	<p>Strategic platform Architecturally robust, scalable, future-ready. Likely built on modular or micro-app principles.</p>
31–40 points	<p>Operational but limited Works today, but structural limitations may surface as complexity increases.</p>
21–30 points	<p>Risk of rigidity Short-term fit; long-term challenges likely.</p>
0–20 points	<p>High-risk platform High risk of performance, integration, and scalability issues.</p>
